

About Claranet Portugal

Claranet Portugal is the Portuguese market leader in Information Technologies and a specialist in Cloud, Workplace, Applications, Data & AI and Security solutions and managed services.

Founded in 1996, Claranet Portugal has evolved from an innovative and pioneering Internet Service Provider to an independent Managed Services Provider, with around 1,000 employees operating from two offices (Lisbon and Porto) and two datacentres.

More than 2,200 business customers trust Claranet Portugal to modernise, design, implement and operate their applications, critical infrastructures and data securely, 24x7. It works closely with the world's most influential technology companies, creating innovative services with the best solutions and tools provided by its Strategic Partners.

Make Modern Happen

We enable organisations to make modern happen by being big enough to deliver and small enough to care, by offering adaptive, scalable technology solutions, and by being right where our customers need us to be, moving at their pace, in their local region.

The Right Size – Claranet Portugal is large enough to handle projects of any scale, in any industry, yet small enough to easily adapt to changing customer needs.

The Right Approach – Claranet Portugal guarantees its clients a customised technology adoption strategy and plan that maximizes results and minimizes threats, in an innovative and very pertinent way.

The Right Position – Claranet Portugal provides local resources that understand the customers, ensuring the best response, wherever they may be in their technological journey.

In the endless race to keep up with technology innovation, Claranet Portugal positions itself as a leading partner in technology, transformation, and security, that guarantees customers the right approach in their path of digital transformation.
